DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6, 11, 15-19, 24-26, 28, 30-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Ammar, US Patent Application Publication US 2002/0171141 A1.

Figs. 2-9 of Ammar discloses a transceiver module comprising: Figs. 2A and 2B, receiver MMIC chip package 30 can be read as MMIC chip in a receiver section, transmitter MMIC chip package 34 can be read as MMIC chip in a transmitter section, local oscillator multiplier chip package 36 can be read as MMIC chip in a local oscillator section, printed circuit board 32 can be read as a substrate board, filters 42 can be read as a plurality of filters, interconnects 64b can be read as radio frequency interconnects (see spec. page 2, paragraphs 31-33).

Regarding claims 3, 16, 25, vias 52, 62 can be read as a plurality of conductive vias (see spec., paragraphs 34, 35, 37, 38).

Regarding claims 4, 17, see paragraphs 39, 56.

Regarding claims 5, 18, 30, see Fig. 2B, vias 52.

Art Unit: 2817

Regarding claims 32, 33, see Fig. 8.

Regarding claim 31, see paragraph 35.

Allowable Subject Matter

Claims 7-10, 12-14, 20-23, 27, 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,002,920 of Consolazio et al., # 5,065,123 of Heckaman et al., US Patent Application Publication # US2002/0030250 A1 of Ammar contain some limitations of the claimed invention.
